

WHAT IS GROUNDWATER?

- Groundwater is water found in the cracks and spaces in soil, sand and rock.
- This water can be found almost ANYWHERE.
- It is replenished by rain and snow melt.

Groundwater

RIVERSIDE'S PRIMARY
WATER SOURCE

WHERE DOES RIVERSIDE GROUNDWATER COME FROM?

- We receive our groundwater from the Bunker Hill Basin
- This basin is replenished by the San Bernardino and San Gabriel Mountains.

FEEL GREAT. HYDRATE.
