Welcome back! We hope you all had a relaxing and safe spring break and are looking forward to the new quarter.

As we finish the 2021 academic year with this spring quarter, we hope that burnout and another quarter of remote learning, teaching, and working does not get the best of us.

With new scientific advances with COVID-19 vaccines and individuals doing their part and social distancing, we are returning to some sense of normal!

Welcome back Highlanders. Let's finish the year off strong!

Are you or your loved ones hesitant to get the COVID-19 vaccine? We invite you to an interactive COVID-19 Vaccine Hesitancy Webinar on Wednesday, April 21 at 5 p.m. Healthy Campus has partnered with the UCR School of Medicine to address the fears that UCR community members and their families may have about the COVID-19 vaccines.

Our featured experts are David Lo, MD, PhD, senior associate dean for research and distinguished professor of biomedical sciences and Andres Gonzalez, MD, the chief medical officer for UCR Health.

The webinar presenters will answer pre-submitted questions regarding vaccine hesitancies, misunderstandings, myths, and urban legends. This webinar will help attendees to understand the risks and benefits of getting the COVID-19 vaccine, and to make an informed decision. There will also be a live Q&A portion to ask questions and share your concerns.

This webinar is open to all ages. We hope you and your loved ones will join us! Space is limited, so please register to save your seat.
During Winter 2021, UCR Healthy Campus’ Marketing and Communication Subcommittee launched the #WorkoutWednesday campaign. The #WorkoutWednesday campaign’s purpose is to promote the importance of physical activity amongst the UCR community. Many UCR staff, students, and faculty members participated by sharing ways they incorporate physical activity into their life and why working out is necessary.

Send us your #WorkoutWednesday pics to help inspire fellow Highlanders to stay fit!
